Application for the position of Frontend Developer (Reference OS-FE-26)

Dear Ms Jensen,

I was excited to see your opening for a Frontend Developer. For the past four years I have been working as a frontend developer at Hafenkante Digital GmbH in Hamburg, where I build customer portals for energy suppliers with React and TypeScript. Your focus on accessible public-sector applications matches exactly what I want to do next.

At Hafenkante Digital I led the migration of our largest portal from a jQuery code base to React. I set up a component library with Storybook and introduced automated accessibility checks, which helped our client pass the BITV 2.0 audit on the first attempt. Before that, I completed my B.Sc. in Media Informatics at the Hamburg University of Applied Sciences.

What I would bring to your team is a careful eye for detail, solid experience with modern frontend tooling (Vite, Vitest, Playwright) and the ability to explain technical trade-offs to designers and product owners. I am also keen to learn Vue, which I understand is your main framework.

My notice period is three months. I would be delighted to discuss in an interview how I can contribute to Ostsee Software. Please find my CV and references attached.

Kind regards,

Hannah Fischer
