Thirteen years of building web front-ends, the last ten with Angular. I own the front-end architecture of an insurance sales platform used by 3,000 brokers and mentor the two junior developers in the team. I care about accessibility, test coverage and boring, predictable releases.

EXPERIENCE

Senior Frontend Developer — Feb 2020 – present
RheinPort Insurance Tech GmbH, Düsseldorf

- Architecture and development of a broker portal (Angular 12 → 18, TypeScript, NgRx, RxJS) in an Nx monorepo with four applications and a shared UI library
- Introduced Cypress end-to-end tests and Storybook; unit tests with Jasmine/Karma, later Jest
- Accessibility conformance (WCAG 2.1 AA) for the public quote calculator, audited by an external agency in 2024
- Build and release pipelines in Azure DevOps; technical interviews and onboarding of new front-end developers

Frontend Developer — Mar 2016 – Jan 2020
Mediaworks Düsseldorf GmbH

- Front-ends for publishing clients: migrated two AngularJS applications to Angular 2+, built an editorial dashboard with Angular Material
- Responsive layouts with HTML5 and CSS3/SCSS, REST integration with the clients' CMS back-ends
- Set up Git workflows and code review rules for the five-person front-end group

Web Developer — Jul 2013 – Feb 2016
Krakweb Sp. z o.o., Kraków, Poland

- Websites and web shops for small businesses: HTML, CSS, JavaScript, jQuery, AngularJS; PHP templating for WordPress themes
- Direct contact with customers, estimates and small-project management

EDUCATION

B.Eng. Computer Science (inż.) — 2009 – 2013
AGH University of Science and Technology, Kraków – thesis: "Client-side rendering strategies for data-heavy web applications"
