SKILLS

Frontend
React, TypeScript
JavaScript (ES2023), HTML5
SCSS, CSS Modules
Zustand, React Query
react-i18next

Tooling & testing
Vite, ESLint, Prettier
Storybook
Jest, React Testing Library
Git, GitHub, GitHub Actions (reading pipelines)

Design & other
Figma (handoff, tokens)
Responsive layouts, WCAG 2.1 AA basics
REST APIs, OpenAPI docs
Python (university courses)

LANGUAGES

Italian – native
English – C1 (IELTS 7.5, 2022)
German – B1, evening course towards B2

INTERESTS

Bouldering (Boulderklub Kreuzberg)
Film photography
Volunteer at Berlin React meetup (check-in desk)

Giulia Ferraro

Junior Frontend Developer

Frontend developer with a fresh M.Sc. from TU Berlin and two and a half years of paid React work, the last year and a half full-time. I care about components that are easy to reuse and interfaces that still work with a keyboard. Looking for a frontend team in Berlin where I can grow into a mid-level role.

EXPERIENCE

Junior Frontend Developer

Plantly Technologies GmbH, Berlin (plant-care subscription app) · Apr 2025 – present

- Build features in the customer web app (React, TypeScript, Vite): subscription checkout, delivery calendar, referral page
- Moved the checkout state from prop drilling to Zustand; dropped three bugs from the support backlog in the first month
- Own the shared component library with the designer, documented every component with usage examples
- Component and hook tests for everything I ship; introduced visual review of pull requests in the team
- Consume the Rails REST API, coordinate contract changes with two backend developers

Working Student Frontend Development

Kiezwerk Agentur GmbH, Berlin · Mar 2024 – Feb 2025 (16 h/week)

- Landing pages and small web apps for local clients in React and SCSS; a booking widget for a Neukölln physiotherapy practice
- Accessibility fixes for a city district website (contrast, focus order, form labels)
- Migrated two older projects from Create React App to Vite

Frontend Intern

Studio Bitmap S.r.l., Turin · Jun 2021 – Sep 2021 (summer internship)

- HTML, CSS and JavaScript for an e-commerce theme; first contact with React through a product-filter component

EDUCATION

M.Sc. Computer Science

Technische Universität Berlin · Oct 2022 – Mar 2025

- Thesis: "Accessible component libraries: measuring keyboard coverage in design systems" (grade 1.3); focus on web engineering and HCI

B.Sc. Computer Engineering

Politecnico di Torino · Sep 2019 – Jul 2022

- Final grade 104/110; exchange semester at TU Berlin (summer 2022) that led to the master's

PROJECTS

- **mensa-check** – small React app that shows which TU Berlin canteen has the shortest queue (crowdsourced, ~300 users in 2024), open source
- **tokens-to-scss** – script that converts Figma design tokens into SCSS variables, used at Kiezwerk

Berlin, 8 October 2026
