QUANTAFLOW

Senior Backend Engineer (Java/Kotlin) – f/m/d

Berlin (Kreuzberg) or remote within Germany · Full-time · Permanent · Reference QF-2026-118 · Posted 2 October 2026

Payments | Series B | Hybrid, 2 office days | 85–100k EUR

About us

Quantaflow Technologies GmbH builds payment orchestration for mid-sized online shops: one integration, forty payment methods, smart routing between acquirers. We are 140 people from 31 countries, founded in 2019, profitable since 2024, and we process roughly 2.5 million transactions a day. Engineering is 55 people in nine product teams; English is the working language.

What you will do

- Own services in the routing and settlement domain together with four engineers, a product manager and a designer
- Design APIs that merchants integrate once and never have to think about again
- Take part in architecture decisions: where to split, where not to, what to buy
- Keep the platform boring: observability, on-call (one week in eight, paid), post-mortems without blame
- Mentor engineers in your team and review across teams

What you bring

- 5+ years of backend development with Java or Kotlin, at least 2 of them with Spring Boot in production
- Solid PostgreSQL knowledge: schema design, indexing, migrations under load
- Experience with event-driven systems, ideally Kafka
- You have shipped to Kubernetes before and know what a pod restart loop at 3 a.m. feels like; AWS is our cloud
- Fluent English; German is a plus but not required
- You live in Germany or are willing to relocate (we support the Blue Card process)

Nice to have

- Payments, banking or another regulated domain (PSD2, PCI DSS)
- Experience with Temporal or another workflow engine

What we offer

- 85,000–100,000 EUR per year depending on experience, plus virtual shares
- 30 days of vacation, 1,500 EUR remote-work budget, Deutschlandticket or bike leasing
- Four weeks per year working from anywhere in the EU
- Learning budget of 2,000 EUR and one conference per year

How to apply

Send your CV (no cover letter needed) to **Lena Hofer**, Talent Acquisition, lena.hofer@quantaflow.io or call +49 30 2000 418-22. Please quote reference QF-2026-118. We reply within five working days and the whole process takes about three weeks: intro call, technical interview, a paid take-home or pairing session (your choice), team fit.

Quantaflow Technologies GmbH · Prinzessinnenstraße 19–20, 10969 Berlin · Amtsgericht Charlottenburg HRB 207 331 B · Geschäftsführer: Dr. Ana Petrović, Jonas Lindqvist · We welcome applications from people of all backgrounds.
