Hauke Siebert

Humboldtstraße 44 · 22083 Hamburg · +49 170 55 83 21 09 · hauke.siebert@mailbox.org · github.com/hsiebert

Platform engineer with six years in operations, the last three on AWS. I like small, well-documented systems and get nervous when a deployment needs a person to be awake. German native; CV in English because that has been the working language at my last two employers.

EXPERIENCE

Platform Engineer Jul 2023 – present

Parcelio GmbH, Hamburg – network of parcel lockers, about 90 employees, 40 of them in engineering

- Run the production platform on AWS (EKS, RDS, S3, IAM, CloudWatch), everything described in Terraform; three environments, one AWS account each
- Moved deployments from hand-written kubectl scripts to Helm charts and ArgoCD; a service rollout now takes minutes instead of an afternoon
- GitHub Actions pipelines for about 30 services (build, image scan, deploy to staging); I maintain the reusable workflows the teams import
- Observability with Datadog (APM, logs, monitors); cut the monthly bill by roughly a third by removing unused custom metrics
- On-call rotation (one week in five), incident reviews, runbooks; small internal tools in Python

DevOps Engineer Apr 2020 – Jun 2023

Sievers & Lück GmbH, Hamburg – IT service provider (Systemhaus) for mid-sized companies

- Operated Linux servers (Ubuntu, Rocky Linux) for about 25 customers, partly on Hetzner Cloud, partly in the company's own racks
- Containerised customer applications with Docker and Docker Compose; wrote the first Terraform modules for the Hetzner setups
- GitLab CI pipelines for customer projects, backups with Borg, monitoring with Zabbix
- Second-level support and customer calls; wrote the onboarding guide that new admins still get on day one

Working Student IT Operations Apr 2018 – Feb 2020

Thiesen Spedition GmbH & Co. KG, Hamburg – freight forwarder, 200 users at two sites

- Helpdesk, Windows clients, printers, the usual; scripted user provisioning in PowerShell
- Organised the Wi-Fi survey for the new warehouse together with the network vendor

EDUCATION

B.Sc. Applied Computer Science (Angewandte Informatik) Oct 2015 – Mar 2020

HAW Hamburg – thesis: "Infrastructure as code for small hosting providers" (grade 1.7)

Abitur 2015

Heinrich-Hertz-Schule, Hamburg

SKILLS

Cloud	AWS (EKS, EC2, RDS, S3, IAM, CloudWatch), Hetzner Cloud
Infrastructure as code	Terraform, Helm, Kustomize
Containers	Kubernetes (EKS), Docker, Docker Compose, ArgoCD

CI/CD	GitHub Actions, GitLab CI
Monitoring	Datadog, Zabbix, CloudWatch
Scripting, OS	Python, Bash, PowerShell (rusty), Linux (Ubuntu, Rocky Linux), Git
Certification	AWS Certified Solutions Architect – Associate (2024)

LANGUAGES

German	native
English	fluent (C1), working language since 2020
Danish	basic (A2, evening course at the Volkshochschule)

OTHER

Sailing on the Alster, repairing old bicycles, occasional talks at the Hamburg Kubernetes meetup.

Hamburg, 12 October 2026
